DeWitt Clinton Heritage Steam Passenger Set Owner’s Manual
Congratulations on your purchase of the Lionel DeWitt Clinton Heritage Steam Passenger set.

Your locomotive is ready to run on Lionel or Lionel-compatible O-27 or larger track. Carefully unwrap the locomotive, tender, and passenger cars.

Plug in the harness from the tender into the connector on the underside of the locomotive. See Figure 1.

**Note!** The harness must be plugged into the connector on the underside of the locomotive in order for the locomotive to operate.

![Figure 1. Harness](image1.png)

Connect the draw bar of the locomotive to the tender as shown in Figure 2. Connect the drawbar from the tender to one of the passenger cars. Then connect the two remaining passenger cars.

Place on your AC powered layout, (either conventional or command control)

**Note!** Do not power with DC (direct current) or damage may occur.

You may change the direction of the locomotive operation by moving the direction control switch located on the front of the tender. See Figure 3 below.

**Note!** This locomotive does not have a smoke unit. Do not add smoke fluid.

**Lubricating your locomotive**

Help your locomotive lead a long and productive life on your railroad by maintaining it properly.

We recommend that you purchase a Lionel Lubrication and Maintenance Kit (6-62927), available from your Lionel dealer. Two basic rules to keep in mind: never over-lubricate (a small amount will do) and avoid getting grease or oil on the locomotive’s wheels, contact rollers, or your track.

You’ll know your locomotive requires lubrication when visual inspection reveals dryness on the parts indicated in Figure 4. Remove accumulated dirt and dust before lubricating, and always lubricate any locomotive emerging from prolonged storage.
