Flatcar with Power Boat
Owner's Manual***

Congratulations on the purchase of the Lionel Flatcar with power boat! While the flatcar is equipped with cradles and elastic tie-downs to transport the Power Boat, this speedy vessel can also move under its own power. Remove the boat from the flatcar, add two AA batteries, and the boat can operate in water!

Caution! Water and electricity don't mix! Never expose your trains to water. Be sure that the boat is completely dry before returning it to your layout.

Installing two AA batteries

The Power Boat requires two AA batteries (not included) to operate its impeller. To install the batteries, follow these steps and refer to Figure 1.

1. Unhook the elastic straps from the cradle and remove the boat.
2. Remove the screw at the back of the cabin, then lift the cabin by the arch. Slide the cabin toward the rear of the boat to free the tabs below the windshield.
3. Install two AA batteries. Be sure that the positive and negative terminals correspond with the markings inside the boat.
4. Slide the windshield back into place, then press the cabin into place.

Operating the Power Boat

With the batteries installed, the impeller will begin to operate. Position the rudder to set the direction of the boat, then carefully set the boat on the water. Be sure that the boat remains upright and avoid getting water in the battery compartment.

Caution! The battery compartment is not sealed. Avoid getting water in the battery compartment. Be sure that the boat floats upright.
